

Saguaro National Park - Saguaro Census Plot #9
March 13, 2010 – Park Staff and Volunteers

Saguaro Plot #9

In this figure, green columns represent the number of saguaros counted in 1990; yellow represent 2006, blue represent the first count in 2010 and purple represent the second count in 2010. The x axis breaks down the saguaros into size classes. The total number of saguaros counted is on the far right side of the chart. There has been a decrease in the number of saguaros on the plot since the last Saguaro Census in 2006. However, the second time the plot was surveyed in 2010, more saguaros were found. Surveying a plot twice helps determine the detectability rate of saguaros.
